

## CLAIMS

1. A baby bib comprising of the material neoprene with at least one side of the neoprene being covered in a material facing.
2. A baby bib as claimed in Claim 1 whereby the neoprene material has material facing on both sides.
3. A baby bib as claimed in Claim 1 or Claim 2 whereby the material facing is nylon.
4. A baby bib as claimed in Claim 1 or Claim 2 whereby the material facing is any other material other than nylon.
5. A baby bib as claimed in any preceding claim with a pocket whereby a small piece of neoprene is attached to a larger piece of neoprene by sewing, mainly along the bottom edges so that, in one mode, the two pieces of neoprene are flat against eachother but, by turning the pieces in-side-out, it forms a naturally extended and open pocket on the other side.
6. A baby bib as claimed in Claim 1, 2, 3 or 4 with a pocket whereby a small piece of neoprene is attached to a larger piece of neoprene by sewing, mainly along the bottom edges, whereby the sew line is less than three eighths of an inch (9.5mm) from the edges of the bib, so that, in one mode, the two pieces of material are flat against eachother but, by turning the pieces in-side-out, it forms a naturally extended and open pocket on the other side.
7. A baby bib as claimed in any preceding claim but which has a pocket made of a material other than neoprene.
8. A baby bib as claimed in any preceding claim which has a pocket permanently formed in the open position on one face by the fact that the width of the pocket part is wider than the base material until sewn on causing it to protrude outwards.
9. A bib as claimed in Claim 1, 2, 3 or 4 which specifically does not have a pocket.
10. A bib as claimed in any proceeding claims where an absorbent material or several materials are sewn to the front face.
11. A bib substantially as herein described above and illustrated in the accompanying drawings.
